Fall Greetings! Things are really buzzing around the School of Engineering. We had a wonderful celebration of our Centennial at the Biggest Bash Ever! during Grand Reunion Weekend, seniors are hard at work on their capstone projects, and our latest newsletter is now available online. As we head into the holiday season, we are so thankful for the support and participation of our engineering alumni. Happy Thanksgiving!

A Message from Chad Walsh, MSEE '95, Chair of the Engineering Alumni Board: "I hope many of you had the opportunity to enjoy the events for the 100 year centennial. Intel CEO Paul Otellini presented an insightful discussion of the future of the semiconductor industry and the challenges facing the US economy. Fellow alumni had a great time connecting and networking at “The Biggest Bash Ever” event on Saturday night. Please keep an eye out for more networking events as well as technical seminars by joining our LinkedIn Group "Santa Clara University Engineering." I also want to take this opportunity to invite interested alumni to consider joining our Alumni Board. We are seeking talented and experienced leaders from industry to work with students, other alumni, and the School of Engineering to help promote the goals of the institution. If you are interested in supporting Santa Clara University’s School of Engineering, please send a resume and short statement of interest to Bharat Desai '85: bharat@shalshiv.com."

A Message from Dean Godfrey Mungal: "I want to thank all of our alumni who helped us commemorate the 100th anniversary of the founding of the School of Engineering at our Biggest Bash Ever! last month. More than 300 friends gathered together to celebrate a century of engineering excellence at Santa Clara, the oldest school of engineering in the Valley. (See photos and video well-wishes on our Facebook page.) During the coming year we have many interesting, informative, and fun events planned in celebration of our Centennial. You can find out about them and read about the history of your School on our amazing Centennial website. This is a great time to be a Bronco engineer. I am very honored to be with you at this moment in our history and I hope you will be with us often during this historic year."

A Centennial Moment: The School of Engineering at Santa Clara was founded in 1912 under the direction of our first dean, George L. Sullivan, who led the program for a remarkable 43 years. During WWII, Sullivan organized and managed a program providing Engineering, Science, and Management War Training (ESMWT) courses for the U.S. government not just here on campus at Santa Clara, but also at San Jose State, Stanford, and in industrial plants in California. Women were encouraged to take these courses, and more than 850 certificates were issued to those who completed the ESMWT courses offered under the auspices of Santa Clara University. Read more and upload your own story on our Centennial website: www.scu.edu/engineering/100

Engineering Alums Carl Simpson '72 and Casey McGlynn '75 served as panelists on Bioengineering’s recent Medical Device Innovation Workshop, sharing their expertise with students in SCU Engineering’s fastest-growing field. Thanks for supporting your fellow Broncos, gents! More information.
Our Fall Newsletter is now available online: Read about the latest goings-on in the School of Engineering in our Fall Engineering News. Solar Decathlon, new faculty, earthquake engineering, and more stories await.

Engineering Featured in Santa Clara Magazine. Read about our Robotics Systems Laboratory's nanosatellite adventures in "Up, up, and away," engineering faculty members Radha Basu and Hohyun Lee are featured in "Putting cleantech on the map," and Michael Neumann '03 is profiled in "Change the world." Check 'em out!

We're on Woz Watch: Steve Wozniak, co-founder of Apple comes to Santa Clara as part of the President's Speaker Series, January 26, 2012, 7:30 p.m. Details and registration here.

Save the Date: Senior Design Conference is Thursday, May 10, 2012. Mark your calendar now for next year's Senior Design Conference. Registration for judging the competition will be available in early March. More information here.
